

DS, 498

UNITED STATES PATENT OFFICE.

JOHN HALL, OF WATERTOWN, MASSACHUSETTS.

DESIGN FOR TOY BANK.

Specification forming part of Design No. **8,498**, dated July 27, 1875; application filed June 14, 1875.
[Term of Patent $3\frac{1}{2}$ years.]

To all whom it may concern:

Be it known that I, JOHN HALL, of Watertown, in the county of Middlesex and State of Massachusetts, have invented and produced a new and original Design for Toy Money-Boxes, of which the following is a specification:

My invention consists of the configuration of a toy bank, having front steps, and a human figure standing at the top of the steps in a circular recess, with extended hands, and an opening to receive the money at one side of the human figure, and a dome-shaped top or roof.

In the photographic illustration, A represents the steps; B, the dome-shaped top; c, the human figure, standing with extended

hands in the circular recess D, in which, at the side of the figure, is the opening *d*, to receive the money. C represents the ends of the bank, properly ornamented, and which may contain the name of the bank and the date of the patent.

What I claim as new, and desire to secure by Letters Patent, is—

The configuration of a toy bank, having front steps A, dome-shaped top B, human figure c, with extended hands, recess D, and opening *d*, substantially as shown.

JOHN HALL.
